**DETAILED ACTION**

***Election/Restriction***

RECEIVED  
JUN 28 2002  
TC 3700 MAIL ROOM

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10, are drawn to a reminder product system and method, classified in class 283, subclass 115.
- II. Claims 11 and 12, are drawn to a method of reminding a patient, classified in class 705, subclass 3.

1. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by another and materially different process such as writing prescription information by hand in a file.

2. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

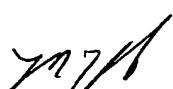

Art Unit: 3722

3. A telephone call was made to Attorney James Balazs on May 17, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
